Planning application 09-AP-0407

TEA TRADE WHARF, 26 SHAD THAMES, LONDON SE1 2AS

Radio base station to include 3 antenna, 2 equipment cabinets and ancillary development

The core group of the Shad Thames Residents' Association strongly oppose the abovementioned planning application on behalf of residents living in the local area. The two main reasons are:

1. This is a conservation area and the erection of this equipment on Tea Trade Wharf would impact not only on the local buildings, but would also mar the view of the riverside from the north side of the river, and from Tower Bridge - surely unacceptable ...

2. In view of the health implications of siting such equipment close to residential premises we urge you to consider the health of local residents and reject the application.

Yours faithfully,

Jilly Frisch

Secretary, Shad Thames Residents' Association
